Professional Summary

Results-driven Backend Engineer with 4+ years of experience specializing in Node.js and building scalable, secure, and high-performance applications. Skilled in designing RESTful APIs, integrating payment gateways, and optimizing backend workflows. Proficient with databases like MongoDB and PostgreSQL, and experienced in DevOps practices including CI/CD pipelines, PM2, Docker, AWS, and the Serverless Framework. Hands-on expertise in Microsoft Azure services such as Function Apps, API Management (APIM), and Storage Accounts. Passionate about delivering clean, maintainable code and contributing to end-to-end product development.

Technical Skills

Languages: JavaScript, TypeScript, SQL

Frontend: HTML5, Next.js, Tailwind CSS, Jest, GraphQL

Backend / Databases: Node.js, Express.js, RESTful APIs, MongoDB, PostgreSQL, Azure Cosmos DB, Payment Gateway Integration

Tools / DevOps: Git, GitHub, GitLab, Postman, Azure (Function Apps, Storage Account, Service Bus, APIM, AKS, Cosmos DB), Docker, PM2, Kubernetes

Core CS: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Networking, Agile Methodologies, Version Control

Professional Experience

Accenture | Jaipur, Rajasthan | Aug 2024 – Present

Custom Software Engineer – Senior Analyst

Project: Canadian Tier – E-Commerce Platform

Role: CDS (Core Digital Services) Developer – Orchestration Layer for Frontend

- Serve as the orchestration layer (CDS) between frontend applications and backend services, ensuring seamless data flow across multiple banners (East Banner & West Banner).
- Work with cloud-native technologies on Azure Kubernetes Service (AKS), leveraging Azure Service Bus, APIM, Azure Functions, Blob Storage, and Cosmos DB for a highly scalable e-commerce architecture.
- Manage and resolve production issues by analyzing logs, identifying root causes, and deploying fixes with minimal downtime.
- Integrate and maintain third-party service connections including Hybris and Gigya for commerce and identity management.
- Ensure platform stability and performance across multi-banner deployments through proactive monitoring and debugging.

Project: MHRA (Medicines and Healthcare Products Regulatory Agency)

- Deployed and maintained backend microservices in a fully serverless Azure environment, ensuring high scalability and resilience.
- Built and optimized APIs using Azure Function Apps and Azure API Management.
- Integrated Azure Service Bus (queues & topics) for asynchronous, decoupled service communication.
- Handled Azure Blob Storage operations for temporary data persistence and efficient processing.
- Collaborated with cross-functional teams to implement CI/CD pipelines using DevOps best practices.
- Performed monitoring, testing, and debugging of Azure Functions to ensure high availability and reliability.

Dotsquares | Jaipur, Rajasthan | Mar 2023 – Sep 2024

Associate Programmer

Projects: PintoGraph | Next Food Level | HubSpot CRM Integration

- Developed dynamic web applications using MERN Stack with secure authentication (Passport.js), image uploads (Multer), and real-time interactions.

- Spearheaded Next.js App Router-based features for scalable and user-friendly interfaces.
- Built MongoDB-powered data storage solutions ensuring performance, scalability, and reliability.
- Integrated HubSpot, ZOHO, and Vantage CRMs with Node.js, enabling seamless data synchronization across systems.
- Delivered optimized backend workflows using Node.js, Express.js, and MongoDB, improving overall efficiency.

Sarv | Jaipur, Rajasthan | Mar 2022 – Mar 2023

Junior Software Engineer

Projects: Voice Broadcasting Engine | Webinar Registration System

- Contributed as a backend developer for a voice broadcasting platform, leveraging REST APIs and MongoDB for large-scale data handling.
- Designed and integrated APIs into React.js frontend, enabling smooth end-to-end communication.
- Implemented authentication (Passport.js) and optimized image storage using Multer.
- Utilized Elasticsearch, Redis, and MongoDB for robust search, caching, and data management.
- Enhanced performance and scalability by streamlining backend workflows and ensuring seamless operations.

Education

Jaipur Engineering College and Research Centre (JECRC), Jaipur | June 2019 – April 2022

Bachelor of Technology (B.Tech) – Computer Science | Grade: A

Birla Technical Training Institute, Pilani | June 2016 – April 2019

Polytechnic Diploma – Computer Science | Grade: A

Certifications

- Full Stack Development – Learn and Build (Jan 2022)
- Artificial Intelligence – Learn and Build (Aug 2021)
- Python in Data Science – Aryan Infomatrix (Jun 2020)
